

Work For Crypto

The Future of Crypto Work

About Work For Crypto

Work For Crypto (WFC) is a brand new platform for recruiting talent and finding work that pays in crypto. WFC uses blockchain technology to create a reliable, fast, and efficient platform and makes use of Dynamite Token (DYNMT) to provide special offers and opportunities for DYNMT holders.

About The Team

The team have a proven track record in the crypto world, having successfully created Dynamite Token which is currently the number one deflationary currency in terms of market cap and user adoption.

Our Vision

Our vision is to establish the most accurate connections by anticipating the needs of workers and employers to each other regardless of distance. In doing so, instead of using conventional payment methods, we are able to offer cheap transfers and small commissions thanks to blockchain technology. This is one of our main goals. Also, as a result of the smart contract, we aim to create a safe, transparent and reliable payment method that is easily available and automated.

Our Mission

Our primary aim is to become the leading freelance platform that provides payment via crypto. There is no doubt that, in future, people will work in a more agile way than being based in an office environment and we plan to develop the freelance business by using blockchain technology to become the world's leading freelance platform.

How It Works

1 Employer & Freelancer Negotiate job and offer

2 Freelancer opens a bid

3 Employer pays fee

4 Freelancer sees the payment process and begins the job.

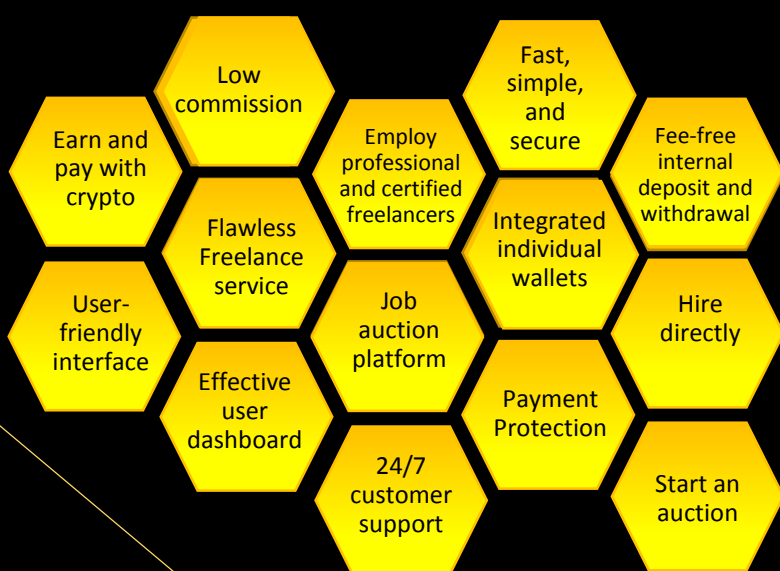

5 Freelancer completes and delivers the job

6 Employer confirms job is completed satisfactorily

7 Freelancer receives payment

Why DYNMT?

Trusted token
Established community
9+ Key Exchanges
Largest deflationary crypto
